EZ-Indicator CPI Labels

LGI's EZ-Indicator chemical process indicating (CPI) labels offer the convenience of sterile process indication with a thermal transfer printable label, eliminating the need for a separate label and indicating dot or tape.

Our line of chemical process indicators include steam and dry autoclave indicators and gamma irradiation indicators.

EZ-Indicator Autoclave CPI labels feature a .25" indicator strip that changes from a barely visible cream to light pink when exposed to 280°F (138°C) (see chart at right).

EZ-Indicator Gamma CPI labels feature a .25" indicator strip that changes from yellow to red when exposed to gamma radiation (See chart at right).

EZ-Indicator Label Features

- Perforation between each label
- .25" strip that clearly indicates chemical process exposure with a visible color change
- Suitable for use with most thermal transfer printers
- UV safe packaging
- Top coat for thermal transfer printing

EZ-Indicator Label Options

- Autoclave or gamma process indication
- Two convenient sizes
- Removable or permanent adhesive options

2x1 EZ-Indicator Autoclave CPI Labels

Part #	Printer Type	Adhesive	Core	Lbls/Roll	Rolls/Pk
L55015	Thermal Transfer	Removable	1" core	350	3
L55016	Thermal Transfer	Removable	3" core	1000	1
L55017	Thermal Transfer	Permanent	1" core	350	3
L55018	Thermal Transfer	Permanent	3" core	1000	1

4x2 EZ-Indicator Autoclave CPI Labels

Part #	Printer Type	Adhesive	Core	Lbls/Roll	Rolls/Pk
L55019	Thermal Transfer	Removable	3" core	1000	1
L55020	Thermal Transfer	Permanent	3" core	1000	1
